Arrangements is a modular system of geometric light elements that can be combined in different ways, creating multiple compositions into individual chandeliers. Each unit simply attaches onto the previous one as if resting, balancing perfectly as a part of a glowing chain.

Please note that the maximum power is 190 watts. You can choose any combination with the caveat that there can only be one 'line' or 'broken line' and when you attach it, it must go at the bottom.

The ceiling canopy is available in two sizes. The first size is Max 70 watts and the second is 190 watts. The appropriate canopy is automatically configured based on your fixture design.

Please use the configurator to build your own custom creation.

Inspiration behind the design:

"I have always been fascinated with the parallel that exists between Lighting and Jewelry. Starting from the simple fact of how each piece relates to human scale: one is designed to be worn on the body whereas the other is made to decorate the space someone occupies. I'm challenged in how the delicate nature of something small can be translated spatially and still manages to retain its preciousness in the way materials are presented. It is no coincidence that the word 'pendant' has a double meaning. Existing both as a piece of jewelry that hangs from a chain worn around the neck, and a light designed to hang from the ceiling" - Michael Anastassiades
